Stainless steel bench scale KERN FOB-S · FOB-NS

Super compact stainless steel balance for weighing, checking and portioning in the smallest of spaces

	KERN FOB-S	**KERN FOB-NS**
Features	• Stainless steel design of the housing and weighing plate. Its smooth surfaces make it simple to clean • High mobility: thanks to battery operation, compact, lightweight construction, it is suitable for the use in several locations (kitchen, sales office, cafeteria, Food industry-Laboratory etc.) • Secure and non-slip positioning through rubber feet • Your support in a HACCP-compliant quality system • Particularly flat design • Protective working cover included with delivery	
		• Protection against dust and water splashes IP65 (only when using battery)
Technical data	• Large LCD display, digit height 20 mm • Permissible ambient temperature 10 °C/40 °C	
	• Dimensions weighing surface, stainless steel, W×D 125×155 mm • Overall dimensions W×D×H 175×155×40 mm • Ready for use: Batteries included, 9 V block, operating time up to 20 h • Net weight approx. 0,70 kg	• Dimensions weighing surface, stainless steel, W×D 150×120 mm • Overall dimensions W×D×H 170×150×40 mm • Ready for use: Batteries included, 9 V block, operating time up to 24 h • Net weight 0,80 kg
Accessories	• Protective working cover, scope of delivery: 5 items, KERN FOB-A11S05	• Protective working cover, scope of delivery: 5 items, KERN FOB-A12S05
	• External mains adapter, KERN FOB-A09

Pictograms

CAL INT — Internal adjusting:
Quick setting up of the balance's accuracy with internal adjusting weight (motordriven)

CAL EXT — Adjusting program CAL:
For quick setting up of the balance's accuracy. External adjusting weight required

ET — Easy Touch:
Suitable for the connection, data transmission and control through PC or tablet.

MEMORY — Memory:
Balance memory capacity, e.g. for article data, weighing data, tare weights, PLU etc.

ALIBI — Alibi memory:
Secure, electronic archiving of weighing results, complying with the 2014/31/EU standard.

RS 232 — Data interface RS-232:
To connect the balance to a printer, PC or network

RS 485 — RS-485 data interface:
To connect the balance to a printer, PC or other peripherals. Suitable for datatransfer over large distances. Network in bus topology is possible

USB — USB data interface:
To connect the balance to a printer, PC or other peripherals

BT — Bluetooth* data interface:
To transfer data from the balance to a printer, PC or other peripherals

WIFI — WiFi data interface:
To transfer data from the balance to a printer, PC or other peripherals

SWITCH — Control outputs (optocoupler, digital I/O):
To connect relays, signal lamps, valves, etc.

ANALOG — Analogue interface:
to connect a suitable peripheral device for analogue processing of the measurements

DUAL — Interface for second balance:
For direct connection of a second balance

LAN — Network interface:
For connecting the scale to an Ethernet network

KCP PROTOCOL — KERN Communication Protocol (KCP):
It is a standardized interface command set for KERN balances and other instruments, which allows retrieving and controlling all relevant parameters and functions of the device. KERN devices featuring KCP are thus easily integrated with computers, industrial controllers and other digital systems

GLP INTERN — GLP/ISO log:
The balance displays serial number, user ID, weight, date and time, regardless of a printer connection

GLP PRINTER — GLP/ISO log:
With weight, date and time. Only with KERN printers.

PCS — Piece counting:
Reference quantities selectable. Display can be switched from piece to weight

RECIPE A — Recipe level A:
The weights of the recipe ingredients can be added together and the total weight of the recipe can be printed out

RECIPE B — Recipe level B:
Internal memory for complete recipes with name and target value of the recipe ingredients. User guidance through display

SUM A — Totalising level A:
The weights of similar items can be added together and the total can be printed out

PERCENT — Percentage determination:
Determining the deviation in % from the target value (100 %)

UNIT — Weighing units:
Can be switched to e.g. nonmetric units. See balance model. Please refer to KERN's website for more details

TOL — Weighing with tolerance range:
(Checkweighing) Upper and lower limiting can be programmed individually, e.g. for sorting and dosing. The process is supported by an audible or visual signal, see the relevant model

MOVE — Hold function:
(Animal weighing program) When the weighing conditions are unstable, a stable weight is calculated as an average value

IP — Protection against dust and water splashes IPxx:
The type of protection is shown in the pictogram.

UNDER — Suspended weighing:
Load support with hook on the underside of the balance

BATT — Battery operation:
Ready for battery operation. The battery type is specified for each device

ACCU — Rechargeable battery pack:
Rechargeable set

MULTI — Universal plug-in power supply:
with universal input and optional input socket adapters for A) EU, CH, GB; B) EU, CH, GB, USA; C) EU, CH, GB, USA, AUS

230 V — Plug-in power supply:
230V/50Hz in standard version for EU, CH. On request GB, USA or AUS version available

230 V — Integrated power supply unit:
Integrated in balance. 230V/50Hz standard EU. More standards e.g. GB, USA or AUS on request

DMS — Weighing principle: Strain gauges:
Electrical resistor on an elastic deforming body

T-FORK — Weighing principle: Tuning fork:
A resonating body is electromagnetically excited, causing it to oscillate

FORCE — Weighing principle: Electromagnetic force compensation:
Coil inside a permanent magnet. For the most accurate weighings

SC TECH — Weighing principle: Single cell technology:
Advanced version of the force compensation principle with the highest level of precision

M +3 DAYS — Verification possible:
The time required for verification is specified in the pictogram

DAkkS +3 DAYS — DAkkS calibration possible (DKD):
The time required for DAkkS calibration is shown in days in the pictogram

ISO +4 DAYS — Factory calibration (ISO):
The time required for Factory calibration is shown in days in the pictogram

1 DAY — Package shipment:
The time required for internal shipping preparations is shown in days in the pictogram

2 DAYS — Pallet shipment:
The time required for internal shipping preparations is shown in days in the pictogram

KERN – Precision is our business

To ensure the high precision of your balance KERN offers you the the appropriate test weight in the international OIML error limit classes E1-M3 from 1 mg - 2500 kg. In combination with a DAkkS calibration certificate the best pre-requisite for proper balance calibration.

The KERN DAkkS calibration laboratory today is one of the most modern and best-equipped DAkkS calibration laboratories for balances, test weights and force-measurement in Europe.
Thanks to the high level of automation, we can carry out DAkkS calibration of balances, test weights and force-measuring devices 24 hours a day, 7 days a week.

Range of services:
- DAkkS calibration of balances with a maximum load of up to 50 t
- DAkkS calibration of weights in the range of 1 mg – 2500 kg
- Volume determination and measuring of magnetic susceptibility (magnetic characteristics) for test weights
- Database supported management of checking equipment and reminder service
- Calibration of force-measuring devices
- DAkkS calibration certificates in the following languages DE, EN, FR, IT, ES, NL, PL
- Conformity evaluation and reverification of balances and test weights
